

Be Fire Safe with Electricity

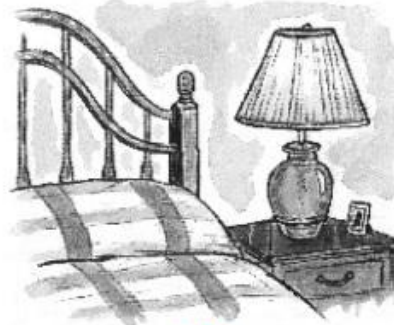

You do not need a flame to start a fire. Fires can start when heat builds up near things that burn. This can happen when a hot light bulb is near things that burn, such as cloth or paper, or when a damaged cord is placed under a carpet.

Keep things that burn, like scarves or other clothes, off lamps.

NO

YES

Keep curtains away from light bulbs. Bulbs can get hot and start a fire.

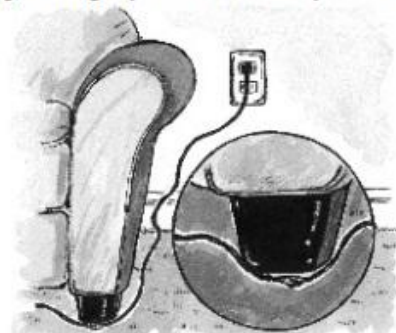

NO

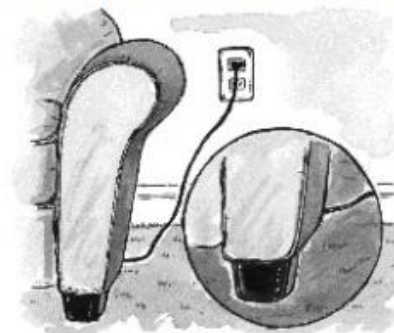

YES

Heavy things placed on top of a cord can wear out the cord and cause a fire.
