9 Students in Fire Training Program

LOOKING TO THE FUTURE

Purchased land adjacent to the LPFPD4 Administration Building further expanding the D4's footprint.

Launched Fire Educational Training program for all high school seniors in Livingston Parish, the first of its kind in the State of Louisiana.

Developed a Master Planning Committee and began the formal process to assess all needs of the district, from population density, land acquisition, environmental analysis, growth forecasting, community needs to a full assessment of D4 assets (equipment, property, staffing to meet the growing needs of Livingston Parish)

Initiated the process with a local engineering firm to finish the design of the new Fire Station 11 on Satsuma Road.
